

## Two Natural Reserve Field Course Opportunities

**Intro to field research and conservation – BIOE 82 (2-units)**

**Natural History of the UCSC Campus – ENVS 15 (2-units)**

**Fall Quarter, 2019**

**We are looking for students interested in taking 2-unit, largely, outdoor-based courses this fall. Please read below, and then fill out the questionnaire at [HERE](#). The first review of applicants will be decided on during the first or second week of September; thus, please have this completed by **midnight on August 30th (the sooner the better)**.**

# Intro to field research and conservation – BIOE 82

## Course Description

Learn about local animals, plants, and ecology, participate in field sampling (plants and animals) methods and field research in general, work with peers to conduct field observational studies, camp out, and get to know your colleagues. We will meet approximately once a week either in the evening for a lecture or on the weekend for a local field trip. We will also have **two** overnight camping trips to local Natural Reserves. No experience (science or camping) is necessary, and we encourage you to apply regardless of your major or your experience spending time in nature. The course is **open to any UCSC student** - you do not need to be a science major. You will receive **2-units of credit**. If you have questions, please contact us.

## Objective

This course serves as an introductory class that focuses entirely on exposing freshmen, sophomore & transfer students to local habitats throughout the Central Coast of California and how to conduct field-based studies. To facilitate immersive field-based teaching, the course will include two weekend camping trips. Lectures will be scheduled as evening sessions to discuss field trips and provide background information, as well as introductory material in field research.

## What you need

Nothing. If you are interested in this experience, you are qualified. There will be two weekend overnight field trips to local Natural Reserves (weather dependent). If you do not have camping gear, we will provide it.

## When?

### Lectures

There will likely be two classes. One class will meet **Tuesday** evenings on campus from **5:20 – 7:00 pm and the other will be Wednesday or Thursday from 5:20 – 7:00**. Lectures will not be held every week, specific schedule will be sent out during the first week or September.

**PLEASE NOTE** – we will likely offer two sessions. One session will likely be for transfer students or students in the second or third year while the other section will be gear towards freshman and sophomores.

### Field Trips

Dates TBD                      Day trip – location TBD; Day trip to the Campus Reserve; Overnight trip to Fort Ord Natural Reserve; Overnight field trip to Big Creek Reserve (leave Friday afternoon/eve)

Overnight trips: There will be two weekend trips that will leave either Friday afternoon or Saturday morning and return Sunday early evening. See dates above.

## How to apply

If you are interested in participating, please fill an online application here August 30th:

[Application/questionnaire](https://forms.gle/PootWrgV4TjVxmNZ6). **Cut and paste the following link:** <https://forms.gle/PootWrgV4TjVxmNZ6>

If you have any **questions** at all, contact Gage Dayton (Director of UCSC Natural Reserves) at [gdayton@ucsc.edu](mailto:gdayton@ucsc.edu) or by phone at 831-459-4867. Students will be notified the first or second week of September regarding their acceptance and given a registration code to register for the course.

# Natural History of the UCSC Campus – ENVS 15

## Course Description

Learn about the plants, animals, fungi, and more of the UC Campus. Develop natural history and journaling skills. No experience is necessary, and we encourage you to apply regardless of your major or your experience spending time in nature. The course is **open to any UCSC student** - you do not need to be a science major. You will receive **2-units of credit**.

## Objective

This course serves as an introductory class that focuses on exposing freshmen, sophomore & transfer students to habitats of the UCSC campus and natural history observation skills. The course will meet Friday mornings and visit various locations on the UCSC Natural Reserve.

## What you need

Walking shoes and a journal. If you are interested in this experience, you are qualified.

## When?

Class will meet **Friday from 9-12:30 each week**.

## How to apply

If you are interested in participating, please fill an online application here by August 30st:
